

Dear colleagues,

on behalf of Organizing Committee it is a great pleasure for us to invite you to take a part at the forthcoming International workshop dedicated to the 90th anniversary of the birth Prof. L.B. Volodarskii. The workshop will be held in Novosibirsk, Russia on June 7, 2021. It will be a forum to exchange knowledge and the results of scientific research in the field of nitroxides chemistry including application in material science and biology. Leading scientists will be invited to share their achievements. Scientific program of the workshop will include invited lectures, oral talks and poster sessions. Due to the current epidemiological situation, the workshop will be held online on the ZOOM platform (with the possibility of full-time participation) without registration fee.

Please find detailed information on the workshop website:

Prof. Leonid Borisovich
Volodarskii
1931 - 2010

2021 marks the 90th anniversary of the birth of Leonid Borisovich Volodarskii, an outstanding Soviet and Russian scientist, a leading specialist in the field of chemistry of nitrogen heterocyclic compounds and stable nitroxyl radicals, laureate the Russian Federation State Prize (1994) and Voevodskii Prize (2002). Professor Volodarskii was the founder of the laboratory of nitrogen compounds NIOCh SB RAS, one of the world's leading laboratories for the synthesis of nitroxyl radicals. The name of Prof. Volodarskii is associated with the synthesis of stable nitroxyl radicals of the 3-imidazoline series, imidazole, pyrazine and pyrimidine *N*-oxide derivatives. More than ten Candidate's degrees and four chemical sciences Doctoral degrees were awarded under his direction. Prof. Volodarskii was the author of more than 300 research articles published in the leading Russian and international journals, 70 Russian Inventor's Certificates, and 6 foreign patents.
